

How to Send TUSC to Another Account

NOTES: It's easy to send TUSC from one account to another using **account names** rather than public keys. If you are trying to send an amount of TUSC equal to a certain amount of USD or other currencies, you can use a calculator like the ones provided on common cryptocurrency trackers.

If you are sending to an exchange, please be sure you follow their instructions regarding memos to have your TUSC credited properly.

1. To get started, visit <https://wallet.tusc.network/wallet/explorer/blocks> and click the menu in the top right corner, then click Login.

2. Use your account name and private key to log in.
3. Then return to the menu in the top right corner and click the Send link. If the link is grayed out, you are not logged into your account.

4. Fill in the account name you want to send to, the amount of TUSC, and a memo if you want, then click SEND.
